Physician's Oath

*Now being admitted to the profession of medicine,
I solemnly pledge to consecrate my life to the service of
humanity.
I will give respect and gratitude to my deserving teachers.
I will practice medicine with conscience and dignity.
The health and life of my patients will be my first
consideration.
I will hold in confidence all that my patient confides in me.
I will maintain the honor and the noble traditions of the
medical profession.
My colleagues will be as my family.
I will allow no considerations to intervene between my duty
and my patient.
I will maintain the utmost respect for human life.
I will, under all circumstances, use my knowledge in the
service of humanity.
These promises I make freely and upon my honor.*

This book is dedicated to . . .

Dr. Charles S. Turner

What does the phrase "green vomit" mean to you? Well, to the class of 1993, the words "green vomit" bring to mind Dr. Charles Turner, Associate Professor of Surgery. We learned early in our education that bilious vomiting in an infant is a surgical emergency, and this phrase and Dr. Turner followed us through all four years of our medical school training in lectures in the first two years and in clinical training in the latter two.

Dr. Turner, a native of Greensboro, N.C., received his bachelor's degree from Davidson Col-

lege. Following this, he received his M.D. from Bowman Gray, completed his internship at The Methodist Hospital of Indiana, received his general surgery training at Bowman Gray, and then completed a fellowship in pediatric surgery at Johns Hopkins. He is a member of many professional societies and has an extensive bibliography. He is also integrally involved in multiple committees concerned with our medical education at Bowman Gray.

In addition to all this, he is a dedicated family man to his wife

and three daughters and very active in the Moravian church. Also, many of us have enjoyed his talents as a musician while being entertained by the "Petrus Ridge Boys".

In appreciation for his continuing dedication to educating medical students and housestaff, as well as his contributions to the field of pediatric surgery, to the community, and to the hospital, we proudly dedicate the 1993 Gray Matter to Dr. Charles S. Turner.

“When all the gain from good communication has been achieved and all knowledge from a textbook has been mobilized, there is a final step that is no less crucial than are all the others. This is the wise and scientific integration of all the varieties of data into the biologic portrait of a single human being. This is the art of medicine, and like all great art, it is the skillful and creative application of a scientific discipline to a human problem.”

Dana Atchley, M.D.

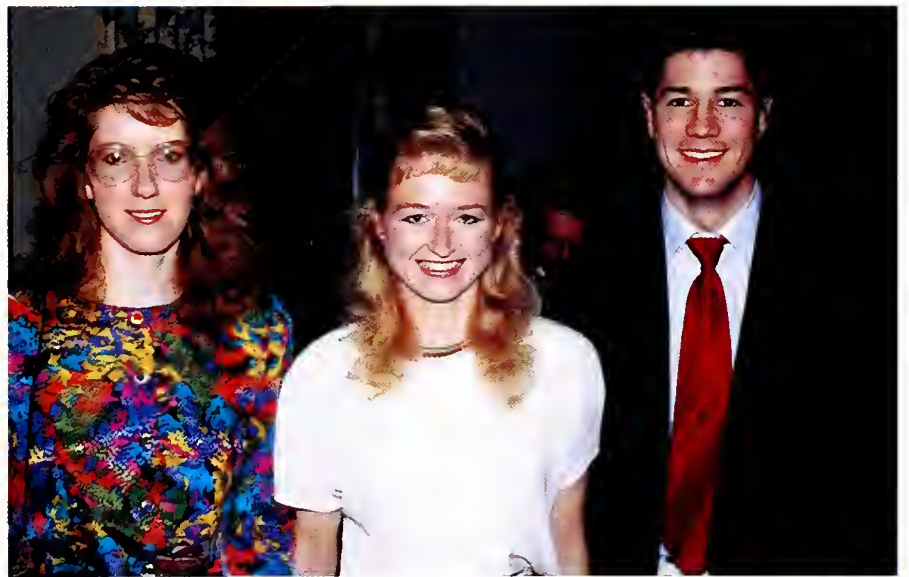

"Humour teaches tolerance, and the humorist, with a smile and perhaps a sigh, is more likely to shrug his shoulders than to condemn. He does not moralize, he is content to understand; and it is true that to understand is to pity and forgive."

An extra special lab family.

Several Doctors and the several reasons why they got there.

If we don't make the PGA tour, I guess we could always be doctors.

And what do you want for Christmas little boys?

Actually Al, flamingos are much more graceful.

I really like being three man.

Silly rescue exercises, we came here to drink.

RHEUMATOID ARTHRITIS

Rheumatoid arthritis is sometimes called rheumatoid disease with a lot of good reason because it is not only an arthritis. It is a condition characterized by a lot of extra-skeletal manifestations. RA is one of the diseases we call an inflammatory arthritis. When you see a patient with an arthritis, most often you're not able to make the diagnosis the first second you see them. You should be prepared to give a differential diagnosis or to think in terms of one. RA is an inflammatory arthritis because of what it looks like not only physically when you examine a patient -you see lots of inflammation and synovitis-but also because of what the actual synovial fluid in the synovium looks like. There is lots of inflammation.

1988 criteria of the American Congress of Rheumatology include the following seven:

1) Morning stiffness-what patients with any inflammatory arthritis often complain of. Will last at least 30 to 60 minutes.

2) Arthritis of 3 or more joint areas-there are numerous joint areas. Want to point out those that are constantly forgotten-includes temporomandibular joint. Disease processes that tend to affect the TMJ include juvenile rheumatoid arthritis, psoriatic arthritis, lupus, and rheumatoid arthritis. It is said that at least 30% of the patients somewhere along the line will develop involvement of the TMJ. It may not present as pain in the joint; may present as an earache or something else. The lumbosacral area is not directly involved in RA but can be indirectly involved in a number of different kinds of ways. For example, steroids or prednisone are grossly overused, and many patients wind up with osteoporosis and fractures and other problems. The patients with RA, just like any of us, are entitled to get mechanical back pain. Patients don't tend to get involvement of the back and if you do find these patients, think of something else.

3) Arthritis of hand joints-use the hands as a mirror to the diagnosis of most arthritic conditions. If you can pick up a patient's hands and look at the joints, thru the distal interphalangeal joints, thru the proximal interphalangeal joints, thru the metacarpal phalangeal joints- Look at the distribution and make some conclusions

MEDICAL ALUMNI
M·A·A
ASSOCIATION

The Medical Alumni Association has established programs aimed at fostering ties among students, house staff, alumni, parents, and the Medical School. For example, the host/mentor program, the student identification and recruitment program, and the Student Advisory Committee are all sponsored by the Medical Alumni Association. The Association conducts an annual giving program which is supported primarily by alumni, former house officers, and parents. The Office of Alumni Affairs also makes available for students and house officers a limited number of complimentary tickets for concerts, the theater, sports, and other activities. Students are encouraged to get involved in both the annual Alumni Weekend held each fall and the biennial Parents Weekend held in the spring. The Office of Alumni Affairs and the MAA welcome student and house staff input at all times, and invite suggestions and comments regarding current and future program ideas.

The Medical Alumni Association Board of Directors promotes communication among alumni, former house officers, parents and the Medical School through studying issues, pursuing questions and offering guidance. The Board governs the Association, which is supported by the Medical School's Office of Development and Alumni Affairs. The Director of Alumni Affairs is Elizabeth Ridgill. Other members of the staff include: Terri Welfare, Administrative Assistant; Tracy Simpson, Alumni Events Assistant; Diane Garrett, Annual Fund Coordinator; and Donna Sizemore, Annual Fund Assistant.

(L to R) Terri Welfare, Beth Ridgill, Tracy Simpson, Diane Garrett, Donna Sizemore

Beth Ridgill awards the Robert R. Perz Memorial Scholarship to Chip Allen and Chris Clapp.

CAREER DAY

The Second annual Career Day occurred in Alumni Plaza on September 28, 1992. The Day is sponsored by The Office of Student Affairs and The Medical Alumni Association. The day gave students from all four years of medical school the valuable opportunity to talk with Faculty and local Bowman Gray practicing alumni. 22 specialties were represented. A strong turn out by both Attendings and students ensured the Day's success.

MEDICAL STUDENT RESEARCH DAY

In the fall of 1992, the eighth annual Medical Student Research Day was held and afforded many students an arena in which to display and to discuss their particular projects. Following a key note address by Dr. Alec Cloewes of the University of Washington, the event continued in the Medical School Board Room where the posters were on display. At this time, the students were available to discuss their research.

When all the votes were in, the first place winner was Ann Thomas, MS II for her research in "The Clinical Application of Polymerase Chain Reaction Amplification of DNA to the Diagnosis of Herpes Virus Infection." Second place was awarded to Ramona Gelzer, MS III and third place to Mary Rosser, MS II. Congratulations to all those who participated.

MATCH DAY

At noon on March 17th, the class of 1993 assembled in the lobby of Watlington Hall, armed with the knowledge that our futures were in our mailboxes. We all waited with anticipation and with hope as we not so patiently watched the clock. When the clock struck twelve, we stampeded into the mailroom, frantically dialed our combinations, and ripped open our envelopes like children on Christmas morning. Clutching that information, we hugged our friends and phoned our loved ones, and then we all celebrated the knowledge that we all had a job for the next year.

Special thanks to the Office of Student Affairs and to the Office of Alumni Affairs for helping make this day extra special!

PARENTS WEEKEND '93

Parents Weekend '93 was a huge success for the parents as well as for this year's charity, the Department of Social Services at North Carolina Baptist Hospital. The weekend began with a dessert reception at Graylyn Conference Center on Friday night. On Saturday, the families and friends were enlightened and entertained by presentations by faculty and students. Guided tours were also available. The final event of the weekend was the faculty-student talent show hosted by Dr. Jerry Punch, a 1979 alumnus.

The weekend was very well attended, and \$4500 was raised for the charity. Special thanks go to the Office of Alumni Affairs, especially Beth Ridgill and Tracy Simpson for all the hard work.

The committee members were as follows: John Mann, Chairman, Dave Kruse, Co-Chairman, David Goff, Trish Patterson, Liz Alada, Rhonda Quick, Beth Del Salvio, Karen Walker, Eric Hawes, Julie Sedor, Carl Senft, Liz Incock, Tara McDonald, and Alan Williams.

Why design your own boards review when a team of experts has done it for you?

Some medical students think **the best way to prepare** for the medical boards is to buy dozens of review books, sequester themselves for days or weeks before the test, and read until they drop. At Kaplan, we think there's a better way...in fact, we invented it. Kaplan USMLE Step 1 preparation is the **most up-to-date** program for the new "comprehensive" boards. **No other prep method** gives you Kaplan's combination of content review and test-based practice questions.

- Thousands of **new**, exam-style practice questions
- Hundreds of hours of audio review
- Eight volumes of basic science home study notes
- Video lectures on the basic sciences
- Expert staff and hot-line assistance
- 150 Kaplan Centers nationwide with full transfer privileges
